

Barco service bulletin

Serial Number: 934
Date: 07/10/2010
Product: LPS replacement kits for DP2K-xxC series

Priority code*: D

- A. "Must" modification, Barco will provide the necessary components to perform this modification at no charge.
- B. Improves the reliability of the product.
- C. Improves the general working conditions of the product.
- D. For information only.

1. LPS REPLACEMENT KITS FOR DP2K-XXC SERIES

1.1 Overview

General

To maximize the spare part commonality across the full DP2K platform, Barco created a single module LPS replacement kit. This kit can be used in all DP2K series projectors.

The kit contains a single LPS module and is equal to the currently mounted LPS module in the DP2K-xxB series.

Next to this kit, 2 new kits are created to replace the full frame LPS currently mounted in a DP2K-xxC projector. These kits should only be used to switch from the full frame LPS to the single frame LPS modules.

Each kit contains a installation manual which explains the replacement procedure.

Overview table

The table below gives an overview of the available kits and use cases..

Kit overview table:

Kit order number	Kit content	When used
R7655232K	2 single LPS modules + fixation frame	To replace the first time a full frame LPS module in a DP2K-15C or DP2P-20C projector. A once-only action. Next replacements should be done with kit R765523K .
R7655231K	1 single LPS module + fixation frame	To replace the first time a full frame LPS module in a DP2K-12C projector. A once-only action. Next replacements should be done with kit R765523K .
R765523K	Single LPS module	To replace a single frame LPS module in all DP2K-series projectors.
